

ROYAL BAKING POWDER

Absolutely Pure

No alum, phosphatic acid or inferior or impure ingredients are used in Royal for the purpose of cheapening its cost; only the most highly refined and healthful. Royal Baking Powder imparts that peculiar sweetness, flavor and delicacy noticed in the finest cake, biscuit, rolls, etc., which expert pastry cooks declare is unobtainable by the use of any other leavening agent.

Alum is used in making cheap baking powders. If you want to know the effect of alum upon the tender linings of the stomach, touch a piece to your tongue. You can raise a biscuit with alum baking powder, but at what a cost to health!

Complete Market Reports Corrected Each Day Giving the Wholesale Prices of Commodities, Farm Produce and Vegetables.

Portland, Oct. 18.—Bears seem to have the best of it again in the hop market, and prices are being forced down, as growers seem more willing to let go than they were at the beginning of the season. Reports of an unusually large crop in England from day to day, and as England is a good customer of America when hops are short in the old country, the loss of her trade has a depressing effect here.

Yesterday William Woolworth, of Rutledge, sold 50 bales of this year's hops to an eastern buyer for 9 1/2 cents per pound. These were the product of this year's vines, and were considered "baby hops" and hardly up to the standard of prime.

What the future may bring forth in hop prices neither dealers, growers nor buyers will venture an opinion. Bears, of course, predict a weak market all through the year, while the bulls have not yet lost heart and look forward to November sales with considerable confidence. These men say Oregon hops are bound to advance, unless growers become frightened and sell at the first offers.

The crop of Oregon is estimated at from 100,000 to 110,000 bales this year. Mutton sheep quotations are very firm, and dealers predict even higher prices than are now offered. The supply from the large woolgrowing districts of eastern Oregon, Washington and Idaho has been cut off from Portland, as a result of woolgrowers saving their sheep for the spring shearing. At the same time, owners of small bands nearer the city are inclined to hold until the holidays at least, when they expect the wethers will command still higher prices. After that many small sheep-owners will seek buyers, as fodder will be getting scarce and stock inclined to fall off in condition.
